SICT Appointed Dr. Bodin as a new CEO

Trust new gen executives, experienced by global microchips giants

Ready to push the company to the next pace

Silicon Craft Technology Public Company Limited (SICT) has notified the resolution of the Board of Directors' meeting to approve the appointment of executive, Dr. Bodin Kasemset, as Chief Executive Officer (CEO), which effective from August 12, 2021 onwards.

Mr. Manop Dhamsirianunt said that "It is very welcome to announce that Dr. Bodin has become Chief Executive Officer (CEO) of the Company. I believe that shareholders, investors, as well as executives and employees of the Company have seen the performance of Dr. Bodin in the past year as Deputy CEO and Co-CEO, in terms of business growth, professional operations, expertise in the company's business, as well as a wide range of experience in the semiconductor industry in a variety of countries around the world. Dr. Bodin has brought his experience to drive the company's business to grow sustainably and ready to compete with global companies.

For my part, I am in charge as Chairman of the Board of Directors and ready to provide opinions and consultations to management in all aspects, so that the company that has grown with me for 20 years to become the first and only company in the upstream semiconductor industry in Thailand, listed in Market for Alternative Investment (mai), Silicon Craft Technology Public Company Limited, goes as far as possible with a new talented executives team who are ready to drive business, develop technology and products in a world of dynamic innovation."

Dr. Bodin Kasemset holds a bachelor's degree from the Faculty of Engineering, Automotive Engineering, Chulalongkorn University, and holds master's degree and Ph.D. in Microsystem Technology from Hamburg, Germany. Dr. Bodin has worked with global semiconductors giant, NXP

Semiconductors, for nearly 15 years in Germany, Austria, Netherlands, Philippines, and Thailand, as a senior executive who was responsible for technology research and development, project management and product management.

Silicon Craft Technology Public Company Limited is committed to develop technology and products to drive the world of the future and create sustainable economic growth in the long run with smart microchips that will drive innovation in areas, such as smart farms, security equipment for future cars, e-commerce, digital innovation for health, IoT-powered automation, etc.
